

CAMPOS®

Stretch knitted fabric.

HEMP

Its cultivation is fast and requires less water than the cultivation of other fibers. It absorbs moisture and has a protection against UV rays of 95%. Fabrics made with hemp fiber have a superior resistance in relation to other fabrics of plant origin, which means that they can last longer without losing their properties. The more it is used, the softer the fiber becomes. It has antibacterial properties, which protect the body and prevent bad odors.

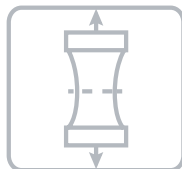

FIBER PROPERTIES

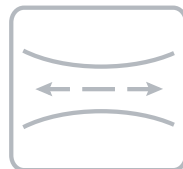

- High resistance
- Tear resistance
- Elasticity
- Antibacterial
- Breathable
- Moisture absorption
- Sustainable
- Odor inhibitor
