

# CAMPOS®

Stretch knitted fabric.

## ANTI-MOTH

---

At Campos, we offer an advanced anti-moth treatment that protects mattresses and textiles from deterioration caused by moths and other insects, preserving them in good condition for longer.

Our innovative anti-moth treatment creates an effective barrier that prevents larvae proliferation and safeguards fibres over time.

- Prevents larval growth, protecting fibres from irreversible damage.
- Extends the lifespan of mattress and upholstery fabrics.
- Maintains the fabric's texture and comfort without affecting softness.
- Offers long-lasting protection, ideal for homes, hotels, and commercial spaces.

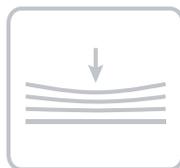

Quality textiles deserve the best protection. Don't let moths ruin your fabrics—keep your spaces pest-free and in pristine condition.
