

CAMPOS®

Stretch knitted fabric.

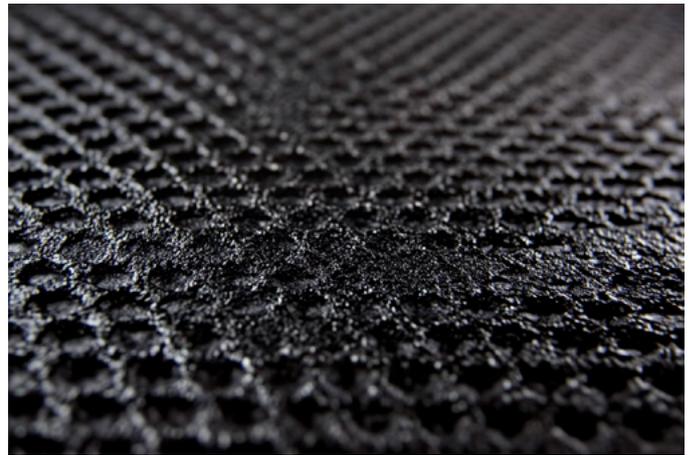

ANTI-SLIP

In our constant pursuit of high-performance textiles, we've developed an exclusive treatment: Non-Slip, designed to improve stability and fabric adherence in mattresses.

This innovative treatment not only enhances safety and comfort but also increases the durability and usability of the final product.

Technical Features:

- **High adherence:** significantly improves mattress grip to the bed base or platform.
- **Durability:** maintains anti-slip properties even under continuous use.
- **Compatibility:** can be applied to various types of fabric without affecting softness or breathability.
- **Efficient in manufacturing:** does not interfere with other treatments or fabric handling.
- **Enhanced user experience:** prevents unwanted mattress movement, increasing comfort.
