

CAMPOS®

Stretch knitted fabric.

ANTIPELLING

Campos AntiPilling is an exclusive treatment that preserves the softness of your mattress fabrics, preventing wear and the formation of fuzz or fabric balls.

Thanks to its specialised action, this treatment keeps the fabric texture smooth and pleasant to the touch, providing a superior and longer-lasting sleep experience.

Campos AntiPilling treatment not only ensures exceptional softness but also maintains breathability and resistance, preventing the fabric's structure from degrading. You can enjoy a fresh and comfortable sleep surface night after night without worrying about daily wear.

In addition to preventing friction that could disturb sleep, Campos AntiPilling helps keep your

mattress in excellent condition for longer, ensuring optimal sleep quality without interruptions.
