

CAMPOS®

Stretch knitted fabric.

ARGAN OIL

At Campos, we apply a finish using argan oil, a natural ingredient known for its moisturising, soothing, and regenerative properties—ideal for mattresses that aim to provide skin care and superior comfort.

This treatment enhances the sleeping experience through its softness to the touch and its ability to relieve conditions such as acne, eczema, or irritation. It also protects against skin ageing thanks to its high content of antioxidants and essential fatty acids. Its calming effect makes it perfect for sensitive skin, helping to reduce irritation and support cellular regeneration.

It is a safe and versatile treatment, compatible with all types of fabrics and functional finishes such as antibacterial, anti-mite, or thermoregulating finishes, without affecting the breathability or structure of the material.

Free from harmful substances – Compatible with ecological certifications such as OEKO-TEX Standard 100.
