

CAMPOS®

Stretch knitted fabric.

CO2PURE

At Campos, we continuously seek innovation and sustainability in mattress fabric technology. That's why we introduce CO2Pure, a revolutionary treatment that improves air quality while adding ecological value to our products. CO2Pure is a 100% natural mineral treatment applied to fabrics that acts as an air purifier. It captures and neutralises CO2 and other pollutants, converting them into harmless compounds. This process occurs continuously and requires no maintenance, making it a sustainable, low-impact solution.

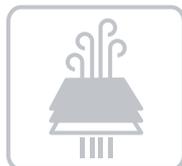

TREATMENT PROPERTIES

- Comfort
- Air purification
- Sustainable and eco-friendly
- Sleep quality
- Antibacterial and antifungal
- Durability
- Soft
- Breathable
- Advanced technology
- Health and wellbeing
