

CAMPOS®

Stretch knitted fabric.

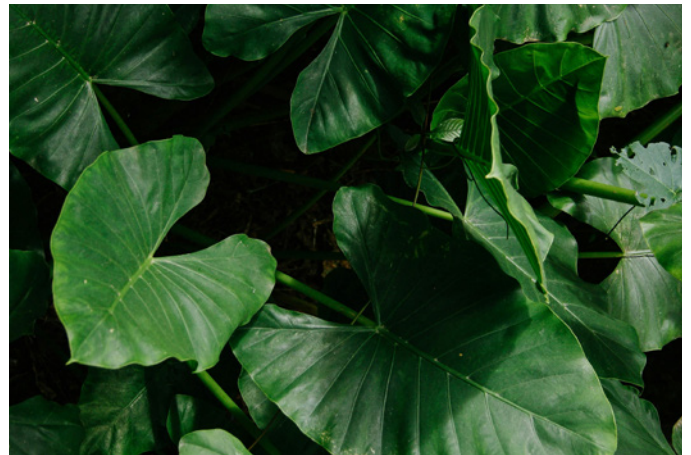

G-FIRST

G-FIRST® is a plant-based, effective solution for protecting against everyday textile parasites. Formulated with geraniol, a plant-derived active ingredient, G-FIRST® treatments combine proven effectiveness with strong environmental and toxicological credentials. They are not classified as skin sensitisers and contain no chemical fixatives.

- Non-neurotoxic: Unlike most common actives, it poses no risk of side effects to the human nervous system.
- Suitable for all types of textiles: including cotton, polycotton, feathers, fibres, wool, etc., and for use in bedding, furniture, clothing, and communal environments.
- Contains geraniol of botanical origin and meets OEKO-TEX Standard 100, REACH, and BPR requirements.

The treatment neutralises dust mites and their eggs, repels the 4 major mosquito species, and repels bedbugs—remaining effective even after several washes.

TREATMENT PROPERTIES

- Anti-parasite
- Natural
- Chemical-free
- Eco-friendly
- OEKO-TEX certified
